1 Synctex Shortcuts

Use the following shortcuts for synctex (aka ‘jumping’ between code and pdf):

- from code to pdf:
 - mac: `cmd + option + j`
 - windows/linux: `ctrl + alt + j`
- from pdf to code: `ctrl + click`

Make sure to enable synctex in the `settings.json`.

```
"latex-workshop.synctex.synctexjs.enabled": true,  
"latex-workshop.synctex.afterBuild.enabled": true,  
"latex-workshop.view.pdf.viewer": "tab",
```

2 Draw Circle
